PROJECTS

Subscription Tracker (Python):

- Uses Django to help organize and list users' subscriptions for easier tracking of renewable fees.
- Uses a login and registration system to be a gatekeeper for the website.
- Allows CRUD operations to help users keep track of their subscriptions.
- Uses Matplotlib to make graphs by using the prices and due dates of each subscription.
- Uses Pagination to allow better readability for many subscriptions.

Quote App (Python):

- A website designed using Django and Bootstrap to allow the user to do CRUD operations on famous quotes.
- Signed-in users could add other users' quotes to their list of favorite quotes and remove them if they want.

DictForYou.com (Python):

- A dictionary website to let everyone search and store all the words that they like.
- Uses WordsAPI to get definitions, synonyms, antonyms data.
- Uses JSON to make data formatting more easy to read.

WORK EXPERIENCE

Relationship Manager

(December '20 -June '21)

Bank of America – Shoreline, WA

- Build strong relationships with teammates, clients, business partners and specialists by having 20 long-term relationship clients in the first pay period month.
- Conduct outbound and inbound client engagement activities, adhering to call monitoring policies.
- Participate in weekly proactive planning sessions for client engagement activities and drive sales-related topics.
- Sell financial products like credit cards, CDs, IRAs, small business loans and open deposit accounts.
- Quote rates, terms and programs for loan customers.

Assistant Manager in Service Experience

(July '15 -December '20)

Nordstrom Rack – Kirkland, WA

- Guiding the team with 15 employees to ensure the team is engaged, positive and providing fast and friendly check out.
- Setting goals for employees each day for rewarding e-receipts, hiring and training new hires for the holiday season.
- Empowering those in service experience with the confidence and tools to take care of the customer, especially in challenging transactions.
- Successful rollouts of N-Seam, Return Hub, Store Operation Model and the Nordy Club.
